

The world's largest independent renewable energy company

As an industry innovator for over 40 years, RES has delivered more than 26GW of renewable energy projects worldwide. We employ more than 4,500 passionate people across the globe and are active in 24 countries, working across onshore and offshore wind, solar, energy storage, green hydrogen, transmission and distribution.

Sustainability lies at the core of our business activity and values, and we have been leading efforts to create a future where everyone has access to affordable zero carbon energy.

By listening, discussing, and working together, we can build clean energy project proposals that power positive change for everyone.

RES in Scotland

RES is a privately-owned company with a proud history in Scotland.

We grew out of Sir Robert McAlpine, a British family-owned firm with over 140 years of experience in construction and engineering including the Glenfinnan Viaduct in the Highlands and the Emirates Arena and Sir Chris Hoy Velodrome in Glasgow.

From our Glasgow office we have been developing, constructing and operating energy projects in Scotland since 1993.

RES has been working in the battery energy storage market for a decade and design safe storage projects using proven Lithium iron phosphate technology. Across the UK and Ireland, RES has developed over 700MW of battery energy storage projects including the development, construction and asset management of Scotland's first utility-scale battery storage facility, the 20MW Broxburn Energy Storage facility in Broxburn, West Lothian.
